PROFESSIONAL SUMMARY .

Creative and innovative entry level software developer with an immense desire to learn and create solutions for complex problems. Broadly familiar with a wide variety of computer languages as well as a firm understanding of the Software Development Life Cycle and Agile Methodologies. Highly adept at collaborating well within a team. Strong communication skills to convey technical information to stakeholders and developers

SKILLS

HTML, CSS, Javascript, NodeJS, LESS, SASS, ExpressJS, Java, C++, Python, SQL, Linux/UNIX, Git,

PROJECTS

Tech Store - https://implication.github.io/Tech-Store/

- This was a sight mockup in order to build a responsive website from scratch using only HTML and css
- This was built with only HTML and CSS in order to fully build up a website without the help of a framework

Simon Says - https://github.com/Implication/Simon-Game

- This was a simple game that I built in order to understand JQuery and it's selectors, as it currently is, the game play's out with 4 buttons on the screen
- This was built with HTML, CSs, Javascript, and JQuery

Calendar App - https://github.com/Implication/466-Project-Untitled

- An Android application that I built with 7 other colleagues in order to understand the SDLC, given different iterations, prototypes, and a final mockup at the end of a 4 month period
- This application was built on android studio with using java and sqlite, while communication was done mainly using slack and documentation created using trello
